Sector

Energy - Environment

Subsector

Photovoltaic energy

Descripción

Ubora is a Malaga-based company specialized in the engineering and installation of photovoltaic systems (solar panels, solar batteries, charging points, etc.)
Our challenge is to help homes and businesses make the transition to their own clean and sustainable energy, providing them with huge savings on their electricity bills and thus eliminating their dependence on large energy companies.
To do this, we have a highly qualified consulting and engineering service that offers our customers customized studies tailored to their energy and economic needs.

Tipo de oferta

Strategic collaborations for the promotion of solar energy in both the residential and business sectors.

Productos

Studies and/or installations of photovoltaic systems for both residential and industrial applications.

Capacidades

The collaborator can be any company dedicated to solar energy, especially photovoltaic, or offering related services, such as solar batteries or charging points.

Acuerdo

Commercial agreement with Technical Assistance
