Descripción

We offer support in matters related to GxP in the pharmaceutical and cosmetic sectors. We provide a complete service, from the regulatory part, through the implementation, maintenance or monitoring of the quality management system, to the analytical services required, including in vitro, in vivo and physico-chemical tests.

Tipo de oferta

We are a young company which gives us a wide flexibility, able to adapt to the most demanding projects.

Productos

Cosmetic regulatory package, including formulation safety study.
Development and quality analysis for cosmetic and pharmaceutical forms
Quality consulting services GxP, ISO9001, ISO/IEC 17025, ISO22716, ISO14001, among others.

Capacidades

SHAPYPRO reaches the market by providing manufacturers of cosmetic and/or pharmaceutical products with a complete service in their quality control operations, from the documentary part to the analytical phase. As well as evaluating the technical competence of accredited analytical laboratories by coordinating inter-comparison exercises, helping to shape the most ambitious projects. Guaranteeing the placing on the market of safe products for consumers, in accordance with the European legislative framework.
For this, we have the best professionals, who guide our customers throughout the process through a fluid and quality communication, adapting to their needs. We differentiate the 3 main business niches of SHAPYPRO at present and their branches.
Inter-comparison Exercises Area: SHAPYPRO organizes proficiency exercises in the area of antiseptics and chemical disinfectants. In addition, SHAPYPRO promotes customized exercises, thanks to the active listening of our customers and a large network of more than 2,000 laboratories. We are able to organize proficiency tests with statistical significance that will add value to your project, help you to extend and/or

maintain your ISO 17025 accreditation.
– Manufacture of reference soap: We offer the reference soap as an added value to the participants of the proficiency tests. Including its certificate of analysis, as well as technical and safety data sheets.
Our quality area: Offers a comprehensive advisory service in certifications, accreditations, quality management systems, GxP, Ecolabel, development of standard operating procedures (SOPs) and follow-up audits. With us you get to have a robust and outsourced quality system, ensuring the independence of the improvement actions in the company.
Regulation: At Shapypro, we have a regulatory consulting department focused on cosmetic products, which offers different types of services. We are in charge of performing both the Safety Report and the PIF of the cosmetic product, labeling review, product notification to the European CPNP portal, training, as well as, Responsible Person service to manufacturing clients, necessary to put safe products on the market.
– Analytical services: We offer analytical services of control, development and research for our regulatory service customers. Including all types of analytical, in vitro, in vivo, and physicochemical assays.
