Information, Informatics and Telecommunications

Subsector

Telecommunications

Descripción

In Easychatbot we specialize in developing cloud applications where you will find solutions (many free) that automate customer service 24 hours a day, with which to talk / play with AI (Artificial Intelligence) by videoconferencing, phone, chat (web and WhatsApp), 3D environments and Virtual Reality, useful for providing information, make appointments, train or launch marketing campaigns with viral power.
You can also create your own custom automation solution, without developer skills (no code), but if you prefer you can hire a qualified professional from our community to build it for you.
With our browser automation technology you will optimize your resources and your staff's time, in addition to being able to make automatic schedules.
