Chemist / Pharmacist

Descripción

Fundación Teófilo Hernando (FTH) is a different CRO with more than 28 years of experience in most of the key indications, a non-profit foundation that provides the best support to all drug development needs for the industry.

We have a great experience in conducting observational clinical studies both locally and internationally where we believe we can find a possible synergy between both companies.

Tipo de oferta

We offer our clinical and pharmaceutical consulting services

Productos

The FTH has the capacity to be involved from the beginning to the last phase of scientific and clinical research, including scientific and technical support in project design, protocol writing, start-up, monitoring, CRF design, clinical data management, preparation of final results reports, statistical analysis and translation of scientific content texts.

Capacidades

Companies interested in the clinical and preclinical development of their products are sought.

Dirigido a

To any company wishing to carry out the clinical development of its product.
