

# XVI CONFERENCIA INTERNACIONAL APTE

**INDUSTRIA 4.0**  
MÁS CONECTADA  
MÁS SOSTENIBLE

22/11/2018 AVILÉS-ASTURIAS

Venue: Centro Niemeyer, Av. del Zinc, s/n, 33490 Avilés, Asturias

The digital transformation and digitization of companies and entities in general is a determining aspect for their competitiveness and **science and technology parks** are developing an important role in supporting this digitization of industry.

In this sense, Spanish science and technology parks are focusing a large part of their activities and services on contributing to the development of this fourth industrial revolution and some of them are being catalogued as **Digital Innovation Hubs (DIHs)**, acting as ecosystems through which companies and entities can improve their production processes, services and business models through the opportunities offered by digitalization.

During this conference will show success stories in the field of digital transformation, both nationally and internationally, with the aim of knowing the situation in which we are now and what are the next milestones and challenges to achieve, taking as a frame of reference the European strategy for the digitization of industry "**Digitizing the European industry**" and the Spanish Initiative promoted by the Ministry of Industry, Trade and Tourism called "**Industry Connected 4.0**" which aims to develop differential competitive levers and the creation of appropriate conditions to promote the competitiveness of Spanish companies, thus building the Spanish model for the industry of the future.

Organizers:

**isla de la innovación**  
PARQUE CIENTÍFICO Y TECNOLÓGICO  
avilés

Collaborators:

**Centro Niemeyer**
